

## Genetic Disease Risk Test

A genetic testing service that scientifically analyzes individual genetic predispositions to evaluate the risk of major diseases, supporting more effective health management through lifestyle improvements and early screening plans.

## Who Should Consider This Service

Individuals with a family history of cancer, Parkinson's disease, or dementia.

Individuals who want to prevent major cancers and chronic diseases.

Individuals who are proactive and interested in their future health.

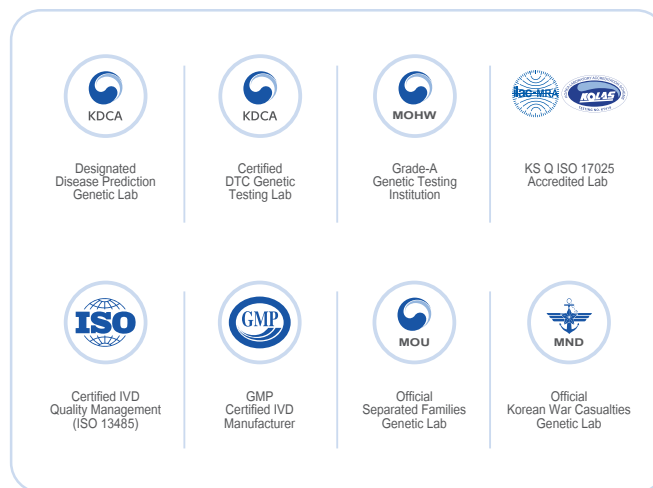

This test is not for medical diagnosis or treatment. For any medical concerns or advice, please consult your doctor.
